

# 12+ Zone Wire-Free Remote Access Card

## How to gain remote access to the control panel:

1. Call the panel and let the phone ring twice then hang up.
2. Wait at least 10 seconds and call the panel again.
3. The panel should answer on the first ring. The panel will say "System On"
4. Press the \* button on your telephone and you will hear "System Activated"
5. At this point you may perform the actions listed in the following table of phone commands
6. When finished using remote access press \* CODE 9.

*\* If 1. and 2. do not connect to panel call again, let the phone ring 12 times and the panel will answer.*
